GEORGE MELK, SR.

WE sincerely thank all of our customers for their business in past years and would like the pleasure of again serving you. If you have never ordered from us may be suggest a trial order. We have received many testimonials on the satisfactory performance of our bulbs and firmly believe they will satisfy the most critical buyer.

P R I C E S

We do our best to price all varieties about in line with other reliable growers, but it seems each year after our catalog is printed we find we have priced some varieties higher than the price asked by other reliable growers. It being too late to change them, we will fill all orders for these varieties with extra bulbs to make up for the difference in price.

The inner part of the floret is light clean yellow deepening toward the center without markings. Florets are nicely fluted and ruffled. Substance is heavy with a rib through the center of each petal. ROSE OF VAN LIMA SPORT (450 Melk) (75) We have been growing this sport of Rose of Van Lima in quantity for our flower trade the past ten years and it is about as reliable as any variety we have. It will bloom good from early until late in the season. The color is cleaner and a little lighter than Rose of Van Lima with a large clean creamy white throat. The florets are smooth petaled with good substance and a bit larger than Rose of Van Lima. Bulbs are extra fine and it is a very fast propagator. Not as fancy as some of the later introductions but a good dependable commercial variety for bulb sales or flowers.

TARGET (441 Larus) (85) Target is the first glad I have seen in many years that closely resembles in color one of the late Richard Dieners' finest cutflower varieties, namely Mrs. H. E. Bothin. We grew and delivered thousands of Mrs. H. E. Bothin to the Milwaukee wholesale florist in the 1920's and it was without a doubt one of the most preferred glads we grew at that time, but like many other good glads we were unable to continue growing it and as far as I know there was nothing since then in glads to replace that fine florist color. Now after all these years, we have Target which has ideal growing habits for commercial use. A very light blush pink color flushed orange with a glowing orange and red throat blotch that opens up to 9 large florets, lightly ruffled on a tall spike. I believe the florist will waste little time in recognizing the commercial value of Target.
